REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

With respect to claim 1, the prior art of record fails to show or suggest a glove holding member having fingers formed by a configuration of bar members each being formed from an individual piece of wire material (see line 6) whereby ends of each bar member are secured in two mounting holes in the base (see lines 6-7), as specifically called for in the claimed combination of claim 1. *With respect to Sawyer*, although Sawyer '682 shows a glove holding member being formed from a wire material, each finger member does not have ends secured in two mounting holes.

With respect to claim 6, the prior art of record fails to show or suggest a combination of a glove holding member and a system for transporting and/or cleaning equipment, whereby the glove holding member comprises an engagement means (see line 8) which releasably engages the glove holder mounting means provided on the system (see line 5) whereby the glove holder mounting means further comprises a hook member and a guide member (see line 9) and a recess on the base of the glove holding member is engageable with the guide member (see line 12) and an opening in the base of the glove holding member engages the hook member (see line 11), as specifically called for in the claimed combination of claim 6.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
